If there is no measuring site with 1/2" ball valve present on existing pipes, it can be set up quickly and cost-effectively by means of hot tapping saddle. The hot tapping saddle is imposed onto the pipe and tightened via thread rods. The enveloping rubber gasket is pressure-tight up to 11 bar. By means of the drilling jig, it is possible to drill the hot tapping saddle through the 1/2" ball valve into the existing pipe.

**Important:** Please indicate the exact outer diameter of the existing pipe when placing the order resp. please select the suitable hot tapping saddle from the adjoining list.
